Profile

A seasoned Full Stack Developer and Web Designer, with over 12 years of experience, known for a unique design style blending modern and classic aesthetics. Proficient in coding languages such as HTML, CSS, JavaScript, and PHP, adept at creating visually striking websites and graphics. Additionally, possesses a keen eye for graphic design, excelling in color, typography, and composition, with expertise in branding and identity design, including logo creation and marketing materials that authentically convey brand identity.

Professional Experience

Full Stack Developer

Freelancer | June 2018 – Present

- Created a tailored Learning Management System (LMS) website utilizing WordPress, Codeigniter, and Javascript for an educational institution, revolutionizing hybrid learning for students.
- Implemented custom responsive designs and accessibility enhancements, resulting in a remarkable 75% increase in student engagement.
- Designed and developed the website and blog content for Inmassat Global Network Company.
- Leveraged the Elementor Plugin to craft multi-page user experiences for single-page applications, exemplified by my portfolio website.

IT Officer

Nigerian Institution of Surveyors | June 2008 – June 2020

- Conceptualized and executed website projects, overseeing every aspect from initial design concepts and site architecture to wireframes and final deliverables.
- Proactively addressed reported website issues by seamlessly integrating innovative solutions into the existing platforms.
- Skillfully managed the website's back-end, including database and server integration, ensuring optimal performance.
- Engaged in seamless collaboration with web development experts, both front-end and back-end developers, to achieve comprehensive web development project objectives.
- Proficiently served as a Computer Network Technician, offering expert technical support to users, and resolving a wide range of computer-related issues.

Projects

- Created an eCommerce website tailored to meet client specifications, delivering an exceptional online shopping experience.
- Demonstrated a high level of professionalism and organizational expertise in the management of our company's internal operations.
- Successfully developed a cutting-edge real estate website for Lightarc Limited, showcasing properties with finesse and functionality.
- Spearheaded the development of a robust Hospital Management System for a Community Health Center, streamlining administrative processes and enhancing patient care
